Interweave Portal

New feature: App bar

What is it?

A new 'App bar' has been introduced to consolidate functionality in a more conventional position, i.e. at the top of the screen. Fundamentally, the usage has not changed, we've just moved existing features from the Left and Right menu's

Standalone Portal users will see this

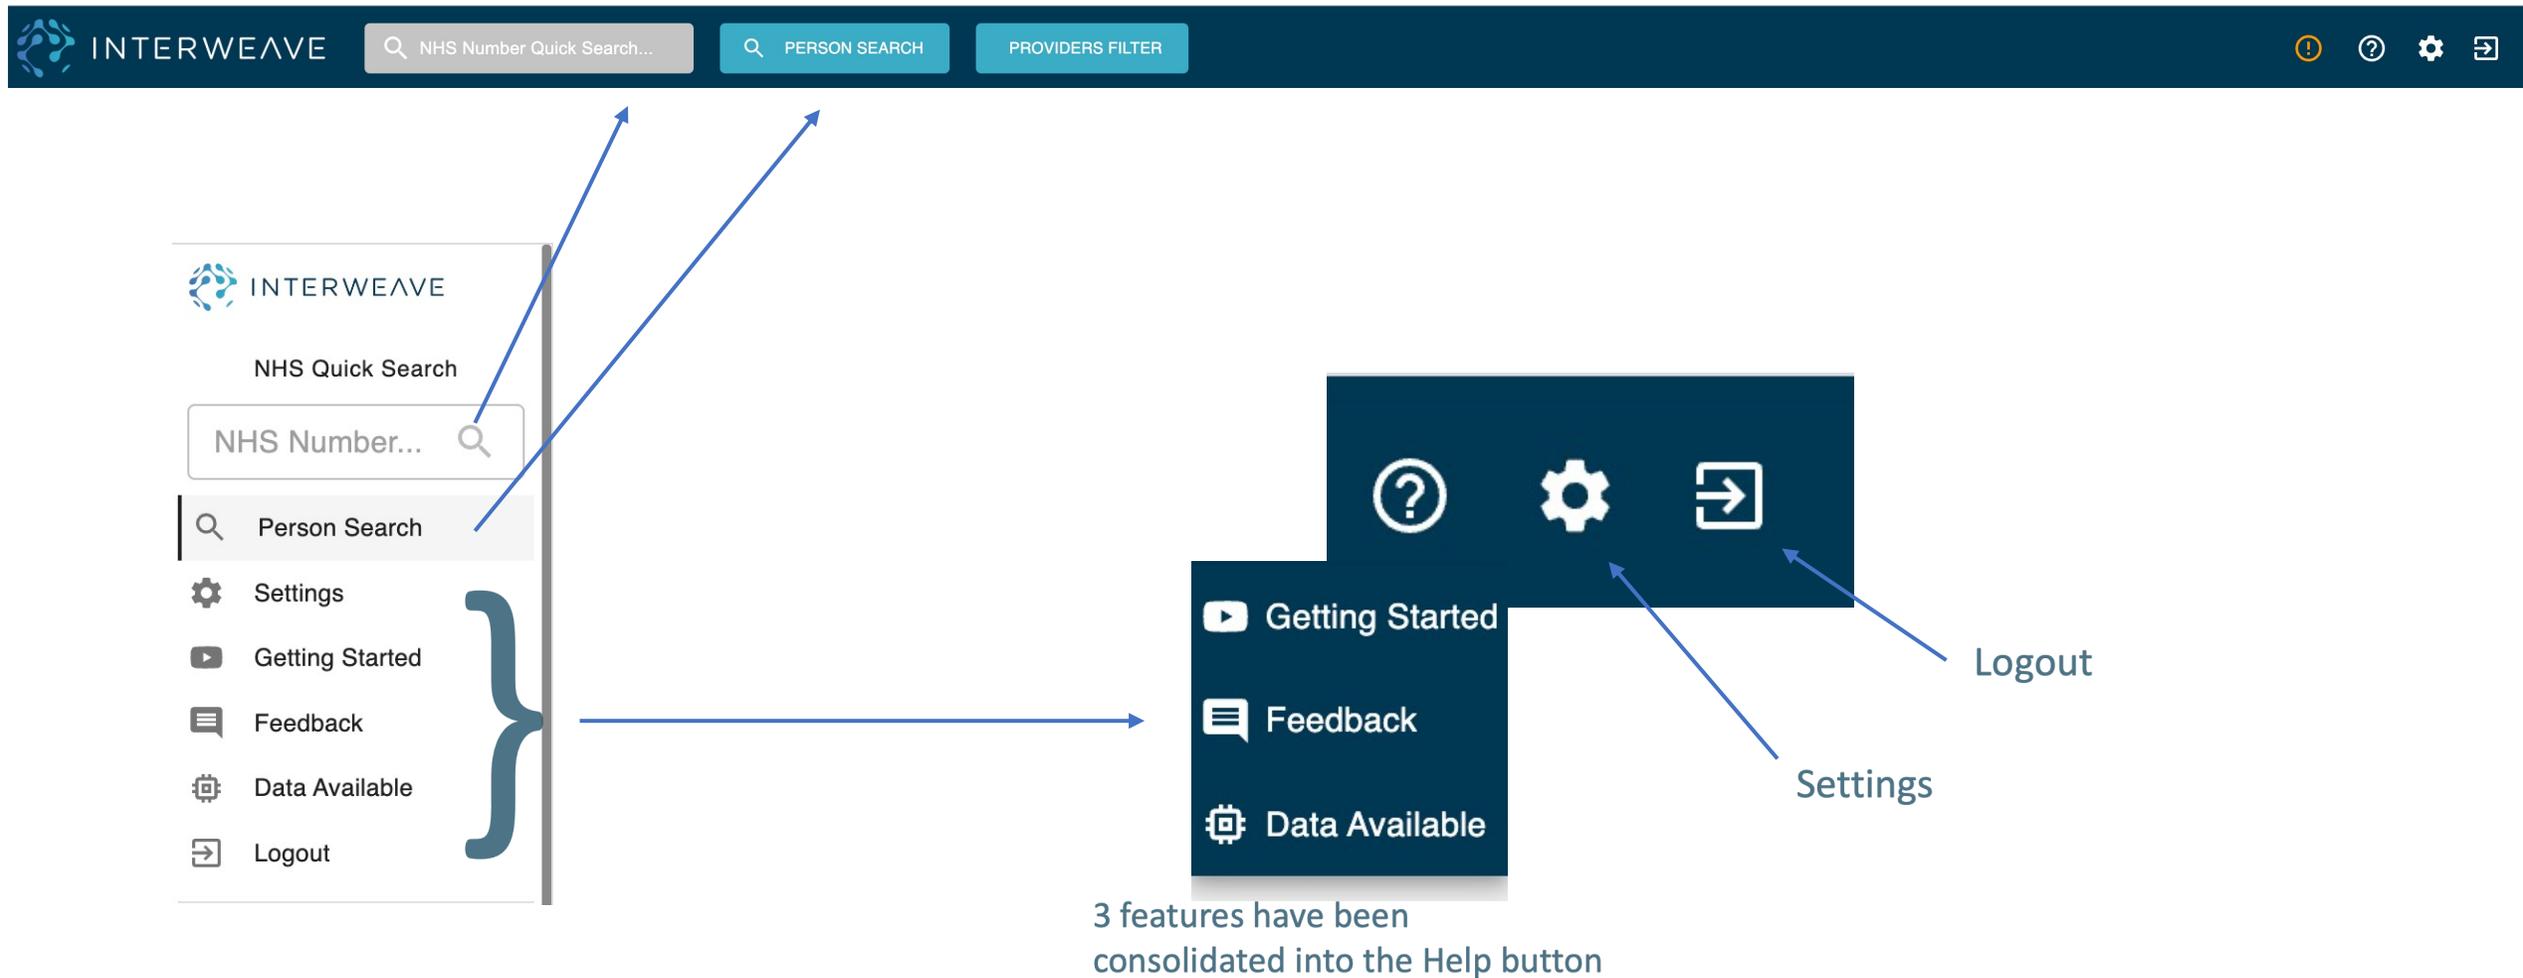

Contextual launch Portal users will see the same, apart from the person search options which are not permitted in contextual launch mode

What is it?

A new 'App bar' has been introduced to consolidate functionality in a more conventional position, i.e. at the top of the screen. Fundamentally, the usage has not changed, **we've just moved existing features from the Left menu**

What is it?

A new 'App bar' has been introduced to consolidate functionality in a more conventional position, i.e. at the top of the screen. Fundamentally, the usage has not changed, **we've just moved existing features from the Right hand side**
